That we have succeeded in producing a material that will, practically, form a fire, water, weather and time-proof Roofing, the experience of fifteen years has fully demonstrated, and we now submit our Roofing to the inspection of those interested, confidently believing that, on examination, their vew judgment will convince them of the correctness of our claims.

The materials of which it is composed combine every requisite for a practically imperishable roof, which will withstand the sudden and frequent changes of any climate without sustaining injury.

We would call attention to the following facts;
First—It is fire and water-proof.
BECOMP—From its great elasticity it is not injuriously affected by extremes of heat and cold.

THIMD—It is adapted to all kinds of recefs, whether steep or flat, and will not require frequent repairs, as is the case with metals and other roofs.

FOUNTS—It will not run in warm nor crack in cold weather, coal-tar forming no part of the composition.

Medicine will cure every disease that the human system is helr to; but, for those above named,
if the directions are strictly followed, he does
most positively promise it will.

The respectability and standing of the parties who
have tried it, (in some cases the parties have been

can be seen at the drug-stores where the medicine is
for sale, it is presumed will be a sufficient guarantee

no humbug.

The demand for this medicine at the South, where
the good effects and permanent cures are known, is
no great that it is almost impossible to fill the orders.
